

BrightSign® XC5

Revolutionary Performance Across Multiple Screens

BrightSign XC5 gives you the power to attract, engage, and captivate across video walls and multi-screen displays. XC5's revolutionary video and graphics performance make it the most powerful player in digital signage.

Simplified Video Walls

Perfect video walls every time.

- Create stunning video walls with a single media player
- Power immersive experiences with 8K video & graphics
- Streamline designs with simple video wall tools & technologies

Multi-Screen Magic

Seamless experiences across multiple screens.

- Connect multiple screens with multi-outputs
- Unify messaging across several displays throughout a venue
- Power unique signage experiences assigned to each HDMI output

Elite Graphic Experiences

PC-class power and engagement.

- Enhance 3D wayfinding with smart pathways and augmented reality
- Deliver PC-class HTML experiences with powerful motion graphics
- Improve user engagement with responsive multi-touch gestures

XC2055 2 HDMI Outputs

Revolutionary video & graphics performance across 2 screens

XC4055 4 HDMI Outputs

Control four screens at once with twice the graphics power

The BrightSign XC5 Advantage

- Multiple 4K HDMI outputs to streamline and simplify video wall and multi-screen deployments
- PC-class HTML power with lightning quick, highly responsive 3D motion graphics to enhance user experiences
- Stunning 8K resolution video and motion graphics support to captivate your audience
- More power, flexibility, and purpose-built capabilities than other digital signage solutions
- Runs BrightSignOS™ delivering legendary security, reliability and uptimes
- Includes Control Cloud for real-time device monitoring and management anywhere, anytime
- Integrated with a huge global network of top CMS partners

BrightSignOS™

The power behind every BrightSign player.

BrightSignOS™ is built to exclusively run digital signage with unrivaled security, legendary reliability, superior performance, and unmatched sustainability on every BrightSign player.

SECURE

Unrivaled security that reduces risk to near zero with purpose-built file system designed to remove vulnerabilities and only runs signage.

- Protected operating system with a secure digital signature
- Runs a singular signage application to protect against viruses
- Configurable to any type of security profile
- Security extends to integrated CMS solutions

RELIABLE

Legendary reliability with <0.1% failure rates and unmatched uptimes that monitor and resolve issues without intervention resulting in a lower total cost of ownership.

- Persistent self-healing protocols resulting in unmatched uptimes
- Secure built-in remote player management and monitoring
- Remote diagnostics and controls to reduce costly on-site visits
- Removable storage that avoids rip/replace situations

SUPERIOR

Superior signage performance with expert content processing and a rich array of signage features, integrations, and extensions for simple to sophisticated experiences.

- Optimized to run cutting-edge video and motion graphics
- Abundant signage features available with free authoring software
- Integrated with hundreds of global CMS solutions
- Highly extensible to securely run specialized signage technologies

SUSTAINABLE

Unmatched sustainability through efficient power management, a flexible platform, and guaranteed updates that ensure no player gets left behind.

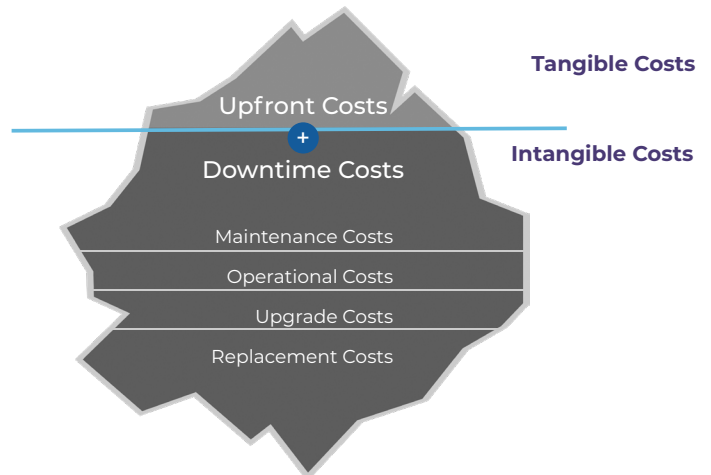

- Low power requirements with high performance
- Guaranteed long life cycle support for unprecedented longevity
- Free updates applied on-demand and consistent across hardware generations
- Remote re-provisioning at any time to ensure flexibility

Invest in BrightSignOS to achieve long-term success

Designed to reduce risk and save on signage.

Downtime is the most expensive investment in signage that often gets overlooked. Failure doesn't happen at implementation, it happens after. BrightSignOS™ is designed to solve and mitigate ongoing risks to avoid rip and replace situations resulting in huge savings throughout the long life of your player.

TOTAL COST OF OWNERSHIP

Hardware Specifications

Front View

Rear View

- USB Type C port: supports high-speed host mode & provides 5V/1A power to peripheral devices
- USB Type A port: provides 5V/1A power to peripheral devices
- GPIO port: 8 bi-directional GPIOs
- Audio port: supports analog digital
- Real time clock: 14-day life

Software Solutions

Flexible solutions to control and monitor players, create presentations, and manage content and signage networks.

Control Cloud

Included with every BrightSign player is free remote player monitoring and management that is accessible anywhere, anytime for one screen to thousands.

BrightAuthor:connected

Free presentation authoring software that unlocks every signage feature supported by BrightSign players, and runs on PC, Mac, and Chrome.

Integrated CMS Solutions

BrightSign players seamlessly integrate with a huge global network of top CMS partners, providing unmatched freedom in selecting a content management solution.

BSN.cloud

Affordable cloud-based solution that includes Control Cloud plus content management, advanced networking, and administration tools to manage mass sets players.
